The company is a clinical-stage biopharmaceutical company that is creating and developing a pipeline of differentiated antibody therapeutics.

To further strengthen our Quality team, we are looking for a motivated GLP Quality Associate with a quality mindset.

The **GLP Quality Associate** will play a role in further build out of R&D quality infrastructure at our client in close collaboration with internal business teams and report to the Head Preclinical Quality & Quality Management.

### KEY ACCOUNTABILITIES AND RESPONSIBILITIES:

The role is responsible for performing duties related to quality review of GLP-compliant plans and reports, working in close collaboration with the PharmToxBA team and Non Clinical & BioAnalytics Quality team:

- External Vendor oversight: vendor qualification and routine audits
- CAPA / deviation / change controls follow-up
- Review of experiments in electronic Lab Notebook
- Review of study plans and reports (both internal and external)
- Drives the implementation of procedures and Work Instructions related to GLP.
- Supports the maintenance and continuous improvements of the QMS system.
- Follow-up on the OECD GLP guidelines

The role may also support the Quality team with additional ad hoc project support.

### DESIRED SKILLS AND EXPERIENCES

- 5y+ experience in a quality assurance role, dealing with biopharmaceuticals with preferable experience in biological analytical methods
- Strong knowledge of GLP OECD guidelines
- Quality attitude; can do mentality
- Good organization and planning skills
- Strong communication skills and able to build relationship with business partners and to work effectively together with others
- Able to operate in a dynamic surrounding of a fast growing biotech company with challenging timelines
- Fluent in English – our working language
