The company is a leading European developer and manufacturer of high-quality and environmentally responsible chemicals for the fire safety industry, both passive (fire-resistant) and active (fire-extinguishing).

PURPOSE OF THE ROLE

- Provide strategic technical guidance and hands-on expertise in the development, testing, and formulation of fire-fighting system foams.
- Lead complex projects focused on compliance with international standards (EN 1568, UL 162, LASTFIRE, and others)
- Ensure cutting-edge product development and market advancement in fire protection solutions.

KEY RESPONSIBILITIES

- Lead and manage high-impact research and development initiatives for fire-fighting foam systems, with a focus on formulation and performance optimization.
- Design, execute, and interpret fire-fighting system foam tests according to EN 1568, UL 162, LASTFIRE, and other relevant standards.
- Provide expert recommendations to senior management on system foam selection, formulation, and compliance strategies.
- Stay updated on industry trends, emerging technologies, and regulatory changes in fire-fighting system foams, integrating these insights into innovation efforts.
- Collaborate with internal teams and external stakeholders to identify opportunities for innovation, optimization, and growth in system foam technology.
- Foster a culture of technical excellence and innovation within the organization.

REQUIRED EXPERIENCE AND KNOWLEDGE

- Minimum 15 years of experience in fire-fighting system foam research, development and testing.
- Advanced knowledge of foam formulation chemistry, fire-fighting system design, and international testing standards (EN 1568, UL 162, LASTFIRE, etc.).
- Demonstrated ability to lead and deliver impactful projects in the fire protection industry.

FUNCTIONAL COMPETENCIES

- **Technical mastery:** Deep understanding of system foam formulation and performance testing.
- **Strategic insight:** Ability to synthesize complex technical data and market insights for strategic direction.
- **Problem solving:** Proficiency in developing innovative solutions to technical challenges in foam systems.
- **Effective communication:** Fluent in English both written and verbal. Exceptional skills in presenting technical findings and recommendations to diverse stakeholders.
